🔧 In 10 years: Being top level software engineer.

💼 In 20 years: Being C level executive.

SKILLS

Software Development 🛠️

Database Development 🗄️

Mobile App & Game Development 🎮

SUMMARY

I am Mustafa Tufan, the software engineering graduate. I am always in pursuit of designing the best software & writing the best line of codes. I am passionate about details, continuously think how to improve myself, where I am & what I do. I always love the small piece of improvements that make products better & people's life easy. In business & socially, I believe in justice & individualism.

At the moment, I am developing with Java, J2EE, JSP, JSF, MSSQL, Sybase, Primefaces, Jasper Reports, Tomcat & Wildfly servers in Infina Software. On an average day, I am responsible to create, code & test Java beans, stored SQL procedures & functions, Primefaces JSF pages & Jasper Reports designs. I developed & published Android apps & Unity3D games in the past. I also have experience on how to use version control & project management systems. I like to use & work with high-end tech products.

I am good at puzzles, abstract thinking & logic. I like chess. I do not smoke. I am a social drinker. I watch sci-fi & fantasy movies. I love story based video games. I can not say that I am good at books but I read wiki pages a lot. My native language is Turkish, I am good at English. Also, I am learning French.

EXPERIENCE

🏢 Software Developer @ Infina Mar. 2016 - Current

Infina is a midsize fintech company, located in Istanbul, Turkey. Currently, working in a team that develops & supports Infleks Operation project that is a back office system for investment banks. Akbank, Şekerbank & Citibank are the major users of Infleks Operation. Mainly, committing to Accounting, Fund, Derivative & Customer modules.
