- 🏆 In 5 years: Being part of best products.
- 👤 In 10 years: Being top level software engineer.
- 🏆 In 20 years: Being C level executive.

SKILLS

Software Development 🍷
Database Development 📄
Mobile App & Game Development 🎮

SUMMARY

I am Mustafa Tufan, the software engineering graduate. I am a software developer who is always in pursuit of designing the best software & writing the best line of codes. I am passionate about details, I continuously think how to improve myself, where I am & what I do. I always love the small piece of improvements that make products better & people's life easy. In business & socially, I believe in justice & individualism.

At the moment, I am developing with Java, J2EE, JSP, JSF, MSSQL, Sybase, Primefaces, Jasper Reports, Tomcat & Wildfly servers in Infina Software. On an ordinary day, I am responsible to create, code & test Java beans, stored SQL procedures & functions, Primefaces JSF pages & Jasper Reports designs. I developed & published Android apps & Unity3D games in the past. I also have experience on how to use version control & project management systems. I like using & working with high-end tech products.

I am good at games, puzzles, abstract thinking & logic. I do not smoke. I am a social drinker. I watch sci-fi & fantasy movies & TV shows. I play mostly story-based video games. I can not say that I am good at books but I read wiki pages a lot. In 2018 I will learn French.

EXPERIENCE

	Software Developer, Infina Software	Mar. 2016 - Current
	Worked in a team that develops & supports Infleks Operation project that is a full automation system for investment banks. AK Investment & Seker Invest are using Infleks Operation. Mainly committed on Accounting, Fund & Customer modules.	
	Intern, Emeltek Software	Jan. - Jun. 2015
